Professional IT Support. Personal Touch.

EXPERIENCED

Is your technology support biting the bottom line?

Proper Technology Solutions is an experienced IT solutions provider, having supported small to medium businesses and schools in the Wichita market for years.

We have experience at all levels and can tailor a solution to meet your needs, allowing your technology to be more productive without breaking the bank. From single-server implementations to multiple-site WANs and VPNs, we can provide the technology to help your business grow.

If your system is running slow or you suspect you are a victim of a virus or spyware attack, let us know. We can remove malicious programs and get your machine back up to speed.

We can also provide additional branding for your business with your own domain name and your own email address and help you market your brand on the Internet.
